

U.S. Patents 9671125, 10,001,289 11022335, 11029061, 11029057, 11175060

- **smart economizer® RCx** patented perimeter gap sealing, automatic calibration for optimal outdoor airflow and indoor air quality, cooling delay correction, fan-on correction, and fan-off delay
- **smart economizer® RCx** energy savings are 10 to 20% for cooling plus fan and 10 to 20% for heating based on Intertek laboratory tests, Energy+ and DOE-2.3 simulations
- **smart economizer® RCx** patented occupancy-based fan control allows occupants to turn on fans to improve Indoor Air Quality when occupied and switches fan control from “on” to “AUTO” when buildings are unoccupied
- **smart economizer® RCx** has a 5-year warranty and will last for life of the HVAC equipment
- **smart economizer® RCx** is protected by U.S. Patents 9671125, 10,001,289, 11022335, 11029061, 11029057, 11175060 and pending patents

smart economizer® RCx

improves
commercial HVAC
efficiency, indoor
air quality and
comfort

smart economizer® RCx improves commercial HVAC efficiency, Indoor Air Quality (IAQ) and comfort

smart economizer® RCx heating savings are 10 to 20% based on reducing unintended outdoor airflow and delivering more heating energy from gas, heat pump, or hydronic systems and **oFx** unoccupied fan control.

smart economizer® RCx cooling energy savings are 10 to 20% based on perimeter gap sealing, calibration for optimal outdoor airflow and IAQ, cooling delay correction, **oFx** unoccupied fan control, and fan-off delay
